

BEST IN CLASS

- Compact and multiple frame sizes from 40 up to 560 m³/h
- Reliable and robust compression principle with extended service life at maximum operation safety via sophisticated BECKER X-vane-composit-material (20,000 operating hours or 36 months warranty)
- Fast and easy On-Site-Service in opposite to other compression principles
- Demand driven variable speed control via VARIAIR inverter technology
- Energy cost reduction in alignment with extended service intervals
- Reduction of sound emission
- Reduction of pump and power load via smooth start under full torque
- 20% increased volume flow with 60 Hz operation @ 50 Hz power supply
- Individual product solutions with integrated and external accessory, e.g. additional filter, sound enclosures, non-return valves ...

VXLF 2.250/0-400

VARIAIR systems control customizes multiple number of VARIAIR Units to an individual central system.
