

PMNG 4 - 40 HE - Nitrogen generators with membrane technology

Features & Benefits

- ▶ Reduced air consumption by 35% on average (up to 51%) versus other membrane generators
- ▶ More flow in the same compact footprint
- ▶ All-in-one plug & play solution
- ▶ Very low sound levels
- ▶ Instant purity selection between 95% and 99.5%
- ▶ Proprietary membrane technology ensuring lasting performance
- ▶ No heater (which requires extra power) needed
- ▶ Guaranteed purity
- ▶ Reliable purity measurement
- ▶ All filters integrated in canopy
- ▶ No buffer vessels required
- ▶ Instant supply of nitrogen
- ▶ No specialist installation or commissioning
- ▶ Optimal control, monitoring and connectivity thanks to new Purelogic™ Controller

General Specifications

- ▶ Membrane Nitrogen Generators
- ▶ Nitrogen purity achievable: 95%-99.5%
- ▶ Inlet pressure range: 4-13 barg/60-189 psig
- ▶ Inlet temperature range: 5-50°C/41-122°F
- ▶ Required inlet air quality: -4:- according to ISO 8573-1:2010
- ▶ Power supply: 115-230VAC/50-60Hz

Options

Oil indicator

Monitors the oil level of the air going into the membranes.

Flow sensor

Ensures 24/7 nitrogen flow monitoring.

Inlet dewpoint sensor

Monitors the inlet dewpoint and triggers a shutdown warning if the dewpoint is too high.

Outlet dewpoint sensor

Visualises the outlet pressure dewpoint for critical applications.

High ambient temperature software

Protects the unit in high ambient conditions.

With the PMNG HE, on-site nitrogen production becomes exceptionally convenient and cost-efficient. A true all-in-one solution, the PMNG HE is ready to go the minute you connect it to your compressor. You don't even need additional process vessels or filtration. You save on floor space too, as the compact and quiet unit can be installed at the point of use. And its 35% on average lower energy use reduces your operational costs and environmental impact.

Membrane nitrogen generation

The PMNG HE uses membrane technology, a very simple, reliable and continuous nitrogen production method. Hollow polymer membranes separate nitrogen from compressed air, permeating enriched oxygen into the atmosphere and leaving quality nitrogen with a purity between 95% and 99.5% at outlet.

Best-in-class membrane technology

- Save 35% on average and up to 51% on running costs compared to other membrane nitrogen generators.
- Everything you need to generate nitrogen is built into the box. No external tanks or filters are needed.
- Top end models provide 43% more flow in the same small
- Thanks to its extremely low sound levels, the PMNG HE can be comfortably installed at the point of use without disturbing operators. canopy size.
- Everything you need to generate nitrogen is built into the box. No external tanks or filters are needed.
